

**STATEMENT OF WORK
Pest Management (595)
Michigan**

These deliverables apply to this individual practice. For other planned practice deliverables, refer to those specific Statements of Work.

DESIGN**Deliverables:**

1. Design documents that demonstrate criteria in NRCS practice standard have been met and are compatible with planned and applied practices.
 - a. Practice purpose(s) as identified in the conservation plan
 - b. Practice standard criteria-related computations and analyses to develop plans and specifications including, but not limited to:
 - i. Identification of targeted species
 - ii. Control methods (e.g., biological, cultural, chemical, mechanical)
 - iii. Environmental risk assessment of planned control method
 - iv. Mitigation techniques, if necessary
2. Written plans and specifications including sketches and drawings shall be provided to the client that adequately describe the requirements to install the practice. Plans and specifications shall be developed in accordance with the requirements of conservation practice standard Pest Management (Code 595).
3. Documentation of needed operation and maintenance.
4. Certification that the pest management plan meets practice standard criteria and complies with applicable laws and regulations.
5. Design modifications during practice application as required.

INSTALLATION**Deliverables**

1. Pre-application conference with client.
2. Layout and communication of setback requirements for wetlands, water bodies, streams, and other pest control-sensitive areas.
3. Application guidance as needed.
4. Facilitate and implement required pest management plan modifications with client and original planner.
5. Advise client/NRCS on compliance issues with all federal, state, tribal, and local laws, regulations and NRCS policies during installation.
6. Certification that the application process and materials meet practice standard requirements.

CHECK OUT**Deliverables**

1. Records of application.
 - a. Extent of practice units applied
 - b. Actual materials/control method/mitigation techniques used
 - c. Application rate, method, and timing
2. Certification that the application meets NRCS standards and specifications and is in compliance with all federal, state, tribal, and local laws and regulations.
3. Progress reporting.
